PROJECT EXPERIENCE SUMMARY — 8.3+ YEARS

#	Project	Period	Duration
1	HRMS — Human Resource Management System	Nov 2025 – Present	10 months
2	Instant Polls — Real-Time Polling SaaS Platform	May 2024 – Oct 2025	1 yr 6 months
3	HCP Asia — Healthcare Project Management Platform	Apr 2023 – Nov 2023	8 months
4	Missions Connect — Digital Content Management	Nov 2021 – Apr 2023	1 yr 6 months
5	The Camp App — Cross-Platform Camp Management	Aug 2020 – Nov 2021	1 yr 4 months
6	Internal Digital Banking Platform (POC)	May 2019 – Apr 2020	1 year
7	Kiboko Mart — Online Shopping Application	Sep 2017 – May 2019	1 yr 9 months
Total Relevant Professional Experience			8.3+ Years

TECHNICAL SKILLS

Frontend	React.js, Next.js 14, Angular 20, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, NgRx, RxJS, React C
Java Backend	Java 8/11/17, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT, OAuth 2.0, RBAC, S
Node.js Backend	Node.js, Express.js, REST APIs, Middleware, Node Mailer, Modular Architectures
Databases	MySQL, PostgreSQL, MongoDB, Hibernate ORM, Spring Data JPA, Mongoose, Query Optimization
Mobile	Ionic Framework, Cordova, Capacitor, Android, iOS, Firebase (Auth, FCM, Crashlytics, Analytics, Remote Config)
DevOps / Cloud	Git, GitHub Actions, Docker, AWS, Vercel, CI/CD Pipelines, Vite, Webpack
AI & Monitoring	OpenAI API, LangChain, RAG, Vector Databases, Prompt Engineering, Sentry, Datadog, New Relic, Lighthouse

WORK EXPERIENCE

Senior Software Engineer — Nat IT Services Pvt Ltd, Hyderabad

May 2024 – Present (1 yr 3 months)

- Leading full stack development of enterprise HRMS (React.js, Node.js, MySQL) for 500+ employees covering Payroll, Leave & Attendance, Recruitment, and Performance Appraisal.
- Delivered Instant Polls — a real-time SaaS polling platform with React.js, Next.js, Java 17 Spring Boot Microservices and OpenAI integration for 5 user roles.
- Implemented RBAC with Spring Security, JWT, OAuth 2.0, OTP, and 2FA; containerized with Docker; CI/CD via GitHub Actions; monitored with New Relic.

Senior Software Engineer — HTC Global Services, Chennai

Apr 2023 – Nov 2023 (8 months)

- Delivered HCP Asia — enterprise healthcare project management platform with React.js, Next.js, Spring Boot, and PostgreSQL.
- Reduced page load time by 35% via SSR, SSG, ISR, Code Splitting, and Lazy Loading; monitored with Sentry, Datadog, and Lighthouse.

Senior Software Developer — SLK Software Pvt Ltd, Bangalore

Nov 2021 – Apr 2023 (1 yr 6 months)

- Built Missions Connect — subscription content platform using Angular 20, Node.js, MongoDB, MySQL, OpenAI, LangChain, RAG, blockchain (IPFS), and Stripe.

Mobile Application Developer — Soniks Services Pvt Ltd, Hyderabad

Aug 2020 – Nov 2021 (1 yr 4 months)

- Developed The Camp App using Angular 20, Ionic, Capacitor, Cordova; published on Google Play and App Store with Firebase Auth, FCM, and Crashlytics.

Junior Software Developer — Versatile Commerce Pvt Ltd, Hyderabad

May 2019 – Apr 2020 (1 year)

- Built Internal Digital Banking POC using Java 17, Spring Boot Microservices, Spring Security, MySQL covering account management, NEFT/RTGS/IMPS transfers, KYC, and statement generation.

Mobile Developer — 2K Services Pvt Ltd, Chennai

Sep 2017 – May 2019 (1 yr 9 months)

- Developed Kiboko Mart e-commerce mobile app using Ionic/Angular/Cordova for Android and iOS serving customers across Uganda and African cities.
- Integrated Firebase Authentication, FCM push notifications, Firebase Analytics; built product listing, flash sales, and order management screens.

KEY PROJECTS — 8.3+ YEARS TOTAL EXPERIENCE

Project 1: HRMS — Human Resource Management System

Nov 2025 – Present | Duration: 10 months

Tech Stack: React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MySQL, JWT, OAuth 2.0, REST APIs, GitHub Actions, OpenAI API

Developing an enterprise-level HRMS automating end-to-end HR operations for 500+ employees, including employee onboarding, payroll processing, leave & attendance tracking, performance appraisal, and AI-powered recruitment with resume parsing and AI interview screening.

- Designing and developing full stack application using React.js, Next.js, TypeScript, and Tailwind CSS for frontend with Node.js and Express.js for backend REST APIs.
- Building Employee Management module covering onboarding, profile management, department assignment, role configuration, and offboarding workflows.
- Developing Payroll & Salary module with salary structure configuration, automated payroll processing, payslip generation, tax calculation, and downloadable salary reports in PDF format.
- Implementing Leave & Attendance module with leave request workflows, approval chains, holiday calendars, attendance tracking, and leave balance management.
- Building Performance & Appraisal module with goal setting, periodic review cycles, manager feedback, rating systems, and appraisal history tracking.
- Integrating AI Interview module using OpenAI GPT-4o-mini with adaptive questioning engine, voice/text modes, and automated scorecard generation for recruiters.
- Implementing multi-role RBAC with JWT authentication for HR Admin, Recruiter, Manager, and Employee roles.
- Setting up CI/CD pipelines using GitHub Actions for automated builds, testing, and deployment workflows.

Project 2: Instant Polls — Real-Time Polling SaaS Platform

May 2024 – Oct 2025 | Duration: 1 year 6 months

Tech Stack: React.js, Next.js, TypeScript, Redux Toolkit, Recharts, Java 17, Spring Boot Microservices, Spring Security, MySQL, Node.js, Docker, GitHub Actions, New Relic, OpenAI API

Developed an enterprise-grade SaaS polling platform enabling organizations to create, publish, manage, and analyze polls in real time. Provides live voting insights, AI-powered question generation, interactive analytics dashboards, and secure role-based access for 5 roles (Admin, Customer, Reseller, Staff, Voter).

- Developed responsive frontend using React.js, Next.js, TypeScript, Redux Toolkit, and Tailwind CSS with a reusable component library.
- Built Java 17 + Spring Boot REST APIs for polls, voting, user management, and reporting with OOP, Collections, Streams, and Exception Handling.
- Implemented Spring Data JPA and Hibernate for CRUD operations with MySQL schema and query optimization.
- Designed RBAC security using Spring Security, JWT, OAuth 2.0, OTP, and 2FA for 5 user roles.
- Integrated OpenAI API for AI-assisted poll question generation; built Node.js microservices for email and background jobs.
- Built real-time analytics dashboards with Recharts; generated downloadable PDF and Excel reports.
- Containerized with Docker; deployed via GitHub Actions CI/CD; monitored production using New Relic.

Project 3: HCP Asia — Healthcare Project Management Platform

Apr 2023 – Nov 2023 | Duration: 8 months

Tech Stack: React.js, Next.js, TypeScript, Tailwind CSS, Spring Boot, Spring Security, PostgreSQL, Node.js, Redux Toolkit, React Query, Sentry, Datadog, Docker, GitHub Actions

Developed an enterprise healthcare collaboration platform to streamline secure workflow management, document sharing, task coordination, and project tracking across distributed teams with role-based access for 5 roles.

- Built scalable React.js and Next.js frontend implementing SSR, SSG, and ISR, reducing page load time by 35%.
- Developed Spring Boot REST APIs using Spring MVC, Spring Data JPA, Hibernate, and PostgreSQL for project workflows and document management.
- Implemented Spring Security with JWT and OAuth 2.0; designed RBAC with role-based route protection.
- Monitored with Sentry, Datadog, and Lighthouse; deployed via Docker and GitHub Actions.

Project 4: Missions Connect — Digital Content Management Platform

Nov 2021 – Apr 2023 | Duration: 1 year 6 months

Tech Stack: Angular 20, TypeScript, NgRx, RxJS, Tailwind CSS, Node.js, Express.js, MongoDB, MySQL, OpenAI API, LangChain, RAG, IPFS (Pinata), Chart.js, JWT, OAuth 2.0

Developed a subscription-based digital content platform for schools, corporate organizations, and Aboriginal communities with blockchain-based content certification and Stripe subscription billing.

- Developed Angular 20 enterprise frontend with Standalone Components, Signals, NgRx, and RxJS for reactive state management.
- Integrated OpenAI APIs, LangChain, RAG, Semantic Search, and Vector Databases for AI-powered chatbot features.
- Integrated blockchain content certification using IPFS (Pinata) and Stripe payment gateway for subscription management.

Project 5: The Camp App — Cross-Platform Camp Management

Aug 2020 – Nov 2021 | Duration: 1 year 4 months

Tech Stack: Angular 20, Ionic, Cordova, Capacitor, React.js, TypeScript, Tailwind CSS, Firebase (Auth, FCM, Crashlytics, Analytics, Remote Config), REST APIs

Developed a camp management solution with a React.js web app and an Angular + Ionic mobile app for Android and iOS, supporting camp registrations, medical records, invoice processing, and real-time notifications.

- Developed cross-platform mobile app using Angular 20, Ionic, Cordova, and Capacitor; published on Google Play Store and Apple App Store.
- Implemented Firebase Auth (Google, Facebook, OTP), FCM push notifications, Crashlytics, Analytics, and Remote Config.
- Implemented offline data synchronization and retry mechanisms to improve user experience in low-connectivity environments.

Project 6: Internal Digital Banking Platform (POC)

May 2019 – Apr 2020 | Duration: 1 year

Tech Stack: Java 17, Spring Boot, Spring Security, Spring Data JPA, REST APIs, MySQL, JWT, OAuth 2.0, Docker, Git

Developed an internal Digital Banking Proof of Concept (POC) to demonstrate secure banking operations including customer onboarding, account management, NEFT/RTGS/IMPS fund transfers, beneficiary management, transaction history, and account statement generation.

- Developed REST APIs using Spring Boot for Customer, Account, Beneficiary, and Transaction Management.
- Implemented secure NEFT, RTGS, and IMPS fund transfer workflows with transaction validation and status tracking.
- Built modules for Account Summary, Transaction History, Beneficiary Management, and Account Statement generation.
- Implemented Spring Security with JWT, OAuth 2.0, OTP authentication, and Role-Based Access Control (RBAC).
- Developed Customer Onboarding and KYC verification modules with validation and exception handling.
- Designed MySQL database tables for Customers, Accounts, Transactions, Beneficiaries, and Audit Logs using Spring Data JPA.
- Implemented global exception handling, logging, and standardized REST API responses.
- Generated downloadable account statements and transaction reports in PDF format.
- Used Postman for API testing, Git for version control, and Docker for containerized deployment.
- Participated in Agile/Scrum ceremonies, code reviews, bug fixing, and production support.

Project 7: Kiboko Mart — Online Shopping Application

Sep 2017 – May 2019 | Duration: 1 year 9 months

Tech Stack: Ionic, Angular, Cordova, Firebase (Auth, FCM, Analytics), REST APIs, JavaScript, HTML5, CSS3

Developed an online shopping application for Kiboko Mart, an e-commerce platform serving customers in Uganda and other selected African cities. The platform provided product browsing, flash sales, special promotions, multiple product categories, secure payment options including mobile money and Cash on Delivery, order management, and customer support.

- Worked on the product from scratch, including UI design, development, and implementation.
- Designed and developed responsive and reusable UI components for the shopping application.
- Built product listing, product details, shopping cart, and promotional screens with focus on usability and responsiveness.
- Integrated Firebase Authentication with Google and Facebook login.
- Implemented Firebase Cloud Messaging (FCM) for push notifications.
- Integrated Firebase Analytics to track user events, navigation flows, and application usage.

- Optimized application performance, responsiveness, and overall user experience.
- Participated in debugging, testing, and production support activities.

EDUCATION

Bachelor of Computer Science | Vikrama Simhapuri University, Nellore | 2015
